PRODUCT DATA SHEET

# FELBER T18 OUTDOOR

DESIGN: DIETIKER, 2018

---

Felber C18 is now ready for the outdoors. This lightweight stacking chair from the Felber Collection looks as good on a private balcony as on a terrace of a restaurant or a cafe. The seat and back, made out of aluminium sheet, are ergonomically shaped. Thanks to the robust powder coating, the chair is resistant to wind and varying weather conditions. The Felber C18 chair is available in 5 selected colours of the Les Couleurs® Le Corbusier and the Arik Levy collections.
