LANTA TABLE

DESIGN: DIETIKER, 2021

The filigree design language of the Lanta table family provides the perfect setting for design and function. High-quality materials perfectly complete the new table family. Important features such as legroom and wheelchair accessibility are offered through clever dimensions and arrangement of the table legs. In addition to the standard sizes, special large and extralong variations are also available on customer request, while maintaining stability and design.

TECHNICAL DATA

CONSTRUCTION

Light-looking table construction without frames.

An invisible fastener connects the base to the table top.

Mounting plate of the legs milled flush into the table top.

CONFIGURATION

Tabletop: Self-supporting plate made of 30 mm multiplex.

Table surface available in HPL, linoleum or veneered

Edge 55 multiplex, also available as solid top

Feet: Solid beech or oak

WOOD SURFACE TREATMENT

Stained with a water-based stain, highly resistant to light, based on dye / pigment inks.

Varnished with a varnish 2-component water-based, PU-based with very good resistance to light and a protective effect to light (UV filter).

Meets the highest standards according to DIN 68861 and the high fire safety regulations (hardly inflammable).

The same applies for the solvent-based paints used for oak.

GLIDES

Standard: Plastic
